CHOOSE THE RIGHT READER

Contact • Contactless • Multi-interface • Mobile

OMNIKEY 3021

OMNIKEY 3021

Portable contact reader

A compact USB reader for secure smart-card login, digital signatures and mobile workstations.

Contact • USB

OMNIKEY 3121

Desktop contact reader

A stable, vertical reader designed for frequent one-hand card insertion at desks and service counters.

Contact • USB

OMNIKEY 5022

Contactless HF reader

A dependable 13.56 MHz reader for secure credentials, identity verification and logical access.

HF • 13.56 MHz

OMNIKEY 5022 IP67

Reader for sterile areas

A sealed IP67 contactless reader for healthcare, laboratories, cleanrooms and wash-down environments.

HF • IP67

OMNIKEY 5023

Contactless HF reader

A compact high-frequency reader suited to everyday credential reading and secure desktop applications.

HF • 13.56 MHz

OMNIKEY 5025CL

HID Prox reader

Extends existing 125 kHz HID Prox employee badges to computer login and other IT-access workflows.

LF • 125 kHz

OMNIKEY 5027

Keyboard-wedge reader

Outputs credential data like a keyboard, simplifying integration with PACS, kiosks and existing software.

HF • Keyboard

OMNIKEY 5422

Dual-interface reader

Combines contact and contactless smart-card technologies in one reader for flexible enterprise deployment.

Contact + HF

OMNIKEY 5427CK

Multi-frequency reader

Supports low- and high-frequency credentials, optional BLE and mobile-access migration in mixed environments.

LF + HF + BLE

OMNIKEY 6121

OMNIKEY 6121 Mobile

Mobile contact reader

A pocket-size reader for SIM-format smart cards, ideal for field teams and professionals on the move.

Contact • Mobile

OMNIKEY SE Plug

Compact RFID reader

A highly portable USB-C RFID reader that brings convenient credential reading to modern mobile devices.

RFID • USB-C

Feature and credential support varies by model. Contact Alyam for configuration, availability and technical guidance.
